## Adlershof. Science at Work.

The Adlershof Science City in Berlin's South East is one of the largest of its kind in Germany and a go-to place for high technology — national and internationally. The local companies and scientific institutions focus on the fields of photonics and optics, photovoltaics and renewable energies, microsystems and materials, information technology (IT) and media, as well as biotechnology and the environment. With eight non-university research institutes, the six institutes of Humboldt-Universität zu Berlin, and 1,200 companies, Berlin Adlershof offers an ideal environment for smart minds from science and business.
